§ 1030.7 Payment of interest.

(a) *Permissible methods*—(1) *Balance on which interest is calculated.* Institutions shall calculate interest on the full amount of principal in an account for each day by use of either the daily balance method or the average daily balance method. Institutions shall calculate interest by use of a daily rate of at least $\frac{1}{365}$ of the interest rate. In a leap year a daily rate of $\frac{1}{366}$ of the interest rate may be used.

(2) *Determination of minimum balance to earn interest.* An institution shall use the same method to determine any minimum balance required to earn interest as it uses to determine the balance on which interest is calculated. An institution may use an additional method that is unequivocally beneficial to the consumer.

(b) *Compounding and crediting policies.* This section does not require institutions to compound or credit interest at any particular frequency.

(c) *Date interest begins to accrue.* Interest shall begin to accrue not later than the business day specified for interest-bearing accounts in section 606 of the Expedited Funds Availability Act (12 U.S.C. 4005 *et seq.*) and the Board of Governors of the Federal Reserve System's implementing Regulation CC (12 CFR part 229). (3) *Minimum balance.* The minimum balance required to obtain the advertised annual percentage yield. For tiered-rate accounts, the minimum balance required for each tier shall be stated in close proximity and with equal prominence to the applicable annual percentage yield.

(4) *Minimum opening deposit.* The minimum deposit required to open the account, if it is greater than the minimum balance necessary to obtain the advertised annual percentage yield.

(5) *Effect of fees.* A statement that fees could reduce the earnings on the account.

(6) *Features of time accounts.* For time accounts:
